REPORT OF AERIAL DETECTION SURVEY

AREA SURVEYED: Ozark National Forest

STATE: Arkansas

COUNTY: Portions of Stone, Baxter, Logan, Yell, Benton, Washington, Crawford, Madison, Franklin, Johnson, Newton, Searcy, Pope and Van Buren

ACREAGE WITHIN SURVEY BOUNDARY: 1,489,070 DATE: February 11-13, 1975

AIRCRAFT: Cessna 182 SURVEY CREW: Drake and Churchill

SURVEY OBJECTIVES: To detect significant bark beetle activity.

SURVEY RESULTS: Only a few scattered single tree spots were detected.

SUMMARY: Since only a very limited number of single tree spots were detected, no ground examination was considered necessary. Pine engraver beetle activity that occurred on the Forest last summer has apparently subsided. Forest personnel are encouraged to continue surveillance for insect or disease activity. Significant findings should be reported to the office below as soon as possible.
